

ACTIVITIES REPORT MARCH QUARTER 2015

INTERNATIONAL UPDATE

GTI has for some considerable time now been in discussions with potential interested parties in respect of funding options to advance the possibility of building and operating a nickel smelter in Indonesia.

Many projects have been evaluated by the team both in Indonesia and other countries however at this time a suitable project has not been identified.

The board will continue to exhaust all avenues in locating a project that is acceptable to the technical team, as a project that would advance the company and shareholder interests.

Shareholders will continue to be fully informed of progress on developments, as they advance past the preliminary stage.

WEST AUSTRALIAN PROJECTS

During the quarter GTI carried out further evaluation on the Henry River and Silver King Projects.

The tenement package of GTI now consists of 13 tenement holdings.

E08/2098 was relinquished during the quarter.

GTI CORPORATE

The Directors continue to investigate alternative funding opportunities to provide ongoing working capital to the company, including a potential capital raising, however no decision has been made on a raising at this stage. Other funding alternatives include short term unsecured borrowings and joint venture opportunities.

In the interim as demonstrated during the 2014 calendar year short term funding requirements are being satisfied by small placements and unsecured loans from directors on an as required basis. The Company is of the belief that it will have sufficient working capital and financial support to fund ongoing activities.
